DESERT GOLD VENTURES INC.
NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2015
(Unaudited - Expressed in US dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Desert Gold Ventures Inc. (the “Company” or “Desert Gold”) is an exploration stage Company with a corporate office at Suite 200 – 8338, 120th Street, Surrey, BC, Canada. The principal business of the Company is conducting mineral property exploration in Mali and Rwanda.

The Company is an exploration stage Company primarily involved in mining and exploration activities which has incurred recurring losses from inception. These condensed consolidated interim financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. As at June 30, 2015, the Company had not advanced its properties to commercial production and is not able to finance day to day activities through operations. The Company’s continuation as a going concern is dependent upon the successful results from its mineral property exploration activities and its ability to attain profitable operations and generate funds from equity and/or debt financing that is sufficient to meet current and future obligations. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern.

These condensed consolidated interim financial statements do not include adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue operations.

2. SIGNIFICANT ACCOUNTING POLICIES

a) Basis of consolidation and presentation

These condensed consolidated interim financial statements have been prepared on an historical cost basis, modified where applicable. These consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information. All dollar amounts presented are in US dollars, unless otherwise specified.

These condensed consolidated condensed financial statements include the accounts of Desert Gold Ventures Inc. and its subsidiaries. All intercompany transactions and balances have been eliminated. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Subsidiaries of the Company are as follows:

Name		Country of incorporation	Ownership percentage	
			June 30, 2015	December 31, 2014

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

b) Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standards (“IAS”) 34 “Interim Financial Reporting” (“IAS 34”) using accounting policies consistent with the IFRS issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). Accordingly, certain disclosures required in annual financial statements have been condensed or omitted. These condensed interim financial statements are intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that these condensed consolidated interim financial statements be read in conjunction with the most recent audited consolidated financial statements for the year ended December 31, 2014.

c) Change in accounting policies and new standards yet to adopted

The Company has not adopted new accounting standards since its recent year ended March 31, 2015. adopted amended International Accounting Standard (“IAS”) 32 on January 1, 2014. This adoption

IFRS 9 “Financial Instruments”

This new standard is a partial replacement of IAS 39 “Financial Instruments: Recognition and Measurement”. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018.

The impact of this new accounting standard has not been determined.

d) Functional and reporting currency

These condensed consolidated interim financial statements are prepared in US dollars which is the Company's reporting currency. The functional currency of the Company is the Canadian dollar. All the Company's subsidiaries use the US dollar as the functional currency except for TransAfrika Mali which uses the CFA franc. The exchange differences resulting from the translation of Desert Gold's financial statements from its functional currency to its reporting currency are included in other comprehensive loss.

e) Use of judgments and estimates

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates, and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income, and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstance.

Critical Judgments

The preparation of these consolidated financial statements requires management to make judgments regarding the going concern of the Company as discussed in Note 1, the functional currency of its subsidiaries and the classification of the Company's financial instruments.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that

period or in the period of the revision and future periods if the revision affects both current and future periods.

Key Sources of Estimation Uncertainty

Share-based compensation

Share-based compensation expense is measured by reference to the fair value of the stock options at the date at which they are granted. Estimating fair value for granted stock options requires determining the most appropriate valuation model which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the option, volatility, dividend yield, and rate of forfeitures and making assumptions about them.

Deferred tax assets and liabilities

The measurement of deferred tax provision is subject to uncertainty associated with the timing of future events and changes in legislation, tax rates and interpretations by tax authorities. The estimation of taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and deferred tax provisions or recoveries could be affected.

Useful life of equipment

Each significant component of an item of equipment is depreciated over its estimated useful life. Estimated useful lives are determined based on current facts and past experience, and take into consideration the anticipated physical life of the asset, existing long-term sales agreements and contracts, current and forecasted demand, and the potential for technological obsolescence.

3. PLANT AND EQUIPMENT

Continuity of the Company's plant and equipment is as follows:

4. EXPLORATION AND EVALUATION ASSETS

Desert Gold Ventures Inc. is an exploration stage Company which holds mining assets in Mali and Rwanda.

Title to resource properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many resource properties.

The Company has investigated the titles to all of its resource properties and, to the best of its knowledge, title to all of its properties is in good standing.

Rwanda Project

The Company, through its wholly owned subsidiary TransAfrika Rwanda Gold SARL, has 100% ownership of the Byumba exploration permit in Rwanda.

Mali: Farabantourou Project

The Company owns the exploration permit through its 74% owned joint venture Company, TransAfrika Mali SA. The project is located in Western Mali.

Mali: Djimbali Project

The Malian Government granted TransAfrika Mali SA, a subsidiary of the Company, the Djimbala gold permit in south-western Mali (the "Djimbala Permit").

Mali: Segala-Ouest Project

This project is located in Western Mali and is considered an early stage exploration project. The project previously consisted of the Loulo Est and Segala-Ouest projects, the two permits have been combined to form one permit. The exploration permit is held by the Company's subsidiary, TransAfrika Mali SA.

11. FINANCIAL INSTRUMENTS (Continued)

Fair value

At the respective reporting dates, all of the Company's financial instruments had maturities less than one year. As a result, the carrying amount of cash, other receivables, accounts payable and accrued liabilities approximated their fair values due to their short-term maturities.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

Cash and investment in guaranteed investment certificate are classified as Level 1.

12. SUBSEQUENT EVENT
